

# Mosquito Exterminator

**Skeeter Vac** - Mosquito exterminator can quietly and safely reduce the nuisance of a number of biting insect species including mosquitoes, black flies, biting midges and sand flies.

The Skeeter Vac mosquito exterminator is designed to be operated 24 hours a day to reduce biting insect populations. It attracts female mosquitoes that are seeking blood meal to nourish their eggs. By removing these females you also remove their eggs. Attracting, trapping and killing just one mosquito at the start of the season can prevent the birth of up to 25,000 more mosquitoes that season alone!

**Includes: Bait Block, Tac Trap and Tank Cover**  
**\*\*20# cylinder sold separately**

- ⊖ Attracts, traps and kills biting insects
- ⊖ Controls population growth
- ⊖ 1.2 acre coverage area
- ⊖ Portable
