MEC APP AVAILABLE NOW!

USEFUL TOOLS

GAS SYSTEM CHECK TOOL:

- Record customer information
- Document container info
- Regulator Check - no longer need to keep track of stickers or write down regulator info. Just scan the Excelsior regulator barcode to auto populate the tag information.
- Pressure Test/System Leak Test - Set the location the test was performed as well as record the start and end pressures. The app automatically adds the date and time stamp for the beginning and end of each test performed.
- System Leak Test - perform and document at the location the testing was complete with the starting and ending pressures with the time stamp for the beginning and end of the test.
- Add notes, installation photos, electronically sign, allow customer to sign and immediately generate a finished PDF form that may be emailed to the back office and to the customer.

GAS APPLIANCE SYSTEM CHECK:

- Record customer information
- Appliance Check - simple "Yes", "No" or "N/A". If "No" the ability to add notes as to why the check failed is available.
- Add notes, installation photos, electronically sign, allow customers to sign and immediately generate finished PDF form that may be emailed to the back office and to the customer.
