

# BASEstation

## ANDROID TABLET

### OPTIONAL FEATURES

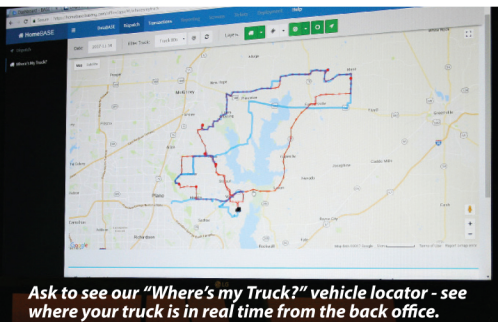

The *BASEstation Android* gives the operator a richer and fuller screen interface than the handheld alone. It is ideal for when truck driver input is required while inside the cab of the truck. It can also be mobile for times when data capture is required outside of the truck.

See nearby customers on-screen!

ProControl3 Integrated Fuel Delivery System...  
 The first and only complete, all-in-one fuel delivery solution!

Ask to see our "Where's my Truck?" vehicle locator - see where your truck is in real time from the back office.

- Show customized data entry and display screens, configured to match the "day in the life" of a truck driver
- Ruggedized design for severe operating environment
- Touchscreen captures driver input, such as log-in details
- WiFi connection to BASEstation HUB
- Perform, record, print DOT Pre-trip truck inspections
- Turn by turn map navigation to customer location
- Captures and displays inventory levels on truck - both initial loading and post delivery
- Displays optimized customer delivery list, will calls, and remaining deliveries
- Built-in GPS brings up customer account details automatically when in proximity
- Search by customer name, location, or address
- Preset by price or volume
- Complete measurement system control and real-time status indication
- Removable for customer signature if required
- In addition to the register's Weights & Measures block, system prints customer invoice and fuel marketer's details
